Auditor Report	2380		

INTERMEDIATE FINANCIAL STATEMENTS**CONSOLIDATED RESULTS**

The consolidated accumulative results for the second half of 2018 are stated in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union, and the results of the individual companies have been prepared in accordance with the General Accounting Plan approved by the Royal Decree 1514/2007 of 16th November standing out the increase in the scope of consolidation due to the acquisition of Clariana and its subsidiary Boncompte and the hyperinflation treatment of the Argentine subsidiary, for the purposes of comparability with those of the same period of the previous year

The main figures are summarized as follows and compared with the previous year was:

<u>Thousand euros</u>	<u>2018</u>	<u>2017</u>	<u>Variation%</u>
Sales	259,257	242,895	6,7%
EBITDA	65,503	61,479	6,5%
Operating Profit ¹	49,800	46,278	7,6%
Profit before tax	49,654	47,986	3,5%
Profit after tax	37,277	37,073	0,6%
Cash-flow after tax ²	52,981	52,274	1,0%

The net turnover consolidated for the second half of the year amounted to EUR 259.3 million, representing an increase EUR 16.4 million to the same period last year.

By business lines, the line of products for the Tobacco Industry increases its sales by 2.3% compared to previous year. Said increase is mainly explained by the product mix, as well as, although to a lesser extent, by the volume traded. This evolution has been framed in a less favourable environment in relation to the previous year of the exchange rates of the dollar and the Argentine peso, the latter having lost a value of 76.7% during 2018, which has been partially offset by the application of various commercial measures.

With regard to sales in the Industrial Products line, which in 2018 includes the proportional part of the new Group company, they have experienced an increase to EUR 8.2 million, representing an increase of 11.3% with respect to the same period of the previous year, driven mainly by the higher volume of sales obtained in Terranova, although in a worse environment of exchange rates than in 2017, and by an upward behaviour of the demand for special pulps.

Sales in the "Other" line amounted to 4.5 million euros, higher than the previous year for incorporating the products marketed by Clariana in this line.

The Parent Company's sales in the current year have reached EUR 171.8 million, which represents an increase of 6.0% compared to the previous period. This increase is basically explained by the product mix and by a higher volume of sales, although affected by a less favourable exchange rate than in 2017.

Profit before consolidated taxes reached EUR 49.7 million, exceeding the 2017 total by EUR 1.7 million, representing an increase of 3.5%. These results were influenced by the effects of hyperinflation at the Argentine subsidiary, which had an adverse effect of EUR 1.6 million on the income statement. Meanwhile, incorporation of the new company, Clariana, has had a virtually neutral effect overall on the year's consolidated figures.

The improvement is attributable to the growth of results in the Tobacco Industry line, driven by investments and a better product-customer mix, factors that have managed to offset the surge in pulp and energy prices. In the Industrial Products line, it is worth noting the positive performance of specialty pulps, sustained by the supply management of commodities and the uptick in activity resulting from higher demand and the performance of Terranova, which has experienced volume improvements and, to a lesser extent, sales price hikes that have enabled it to partially offset the increase of the costs incurred.

Furthermore, profit after tax totalled EUR 37.3 million, a result 0.6% higher than that obtained in the same period of the previous year. The effective tax rate estimated for the period has been of the order of 24.9%, higher than that of the second half of the previous year due to the lower amount to be deducted due to the application of the current tax advantages and due to the accounting application of hyperinflation, which has led to a decrease in the accounting result and the outflow of deferred taxes associated with non-monetary assets.

For the parent company, after-tax profits for this fiscal year reached EUR 30.5 million, down 2.8% relative to the same period the previous year, mainly due to lower dividends from subsidiaries on a one-off basis due to transaction costs of the Clariana acquisition and a higher effective tax rate.

In accordance with this accounting standard, the 2017 financial statements have not been reformulated. A new development to take into account is the fact that Argentina's economy became hyperinflationary as of 1 July 2018, upon meeting the quantitative guideline established by IAS 29 in relation to countries whose cumulative 3-year inflation rates exceed 100%.
